Experience In Healthcare Sector

Proven track record in undertaking studies in Health and Population sector - SRGB has practical experience in conducting studies and research work involving various stakeholders groups for health and population related issues. These include qualitative and quantitative techniques and the findings were used for generating people oriented action programs. The clients of these studies served communities of home and abroad. The broad based nature of the research activities cover divergent issues of this sector ranging from alternative incentive system for HRD in Health & Population Sector for MoHF&W to private health care scenario, etc.
